Skin the head and legs carefully, to void cutting them; then, commencing at he head, draw off the skin without many calfskins. Some farmers use windlass to draw off the dairy skins an we sun cannot shine upon it, and cover it t let it remain in the salt until you take If another; then place that one upon the ntil you get enough to make quite a pile; hen commence another pile in the sam

eep it from rolling about during transit ald of which a barrel may be headed with | will

vely; what the skins do not require wil

A BARREL HEADER. The cut presented shows an inexpensive contrivance in this direction. This header consists of a bar of half inch iron rod, at one end of which is a large loop, while at the other are two diverging hooks, which are adjusted to the lower chime of the barrel when in use. The bar is bent so as to accommodate itself to the curve of the barrel. One end of a short lever is placed on a block set in position on the head of the barrel. A strap with a stirrup or loop at one end is fastened to the other end of the land. the lever. The foot is placed in the stir-rop, and by this means sufficient weight is gained to bring the head of the barrel down in place. The hands being free, the operator can, of course, readily drive down the hoop and fasten in the head without assistance.

The principal reason for cracking corns to get it small enough so that the bickens can swallow it without inconvenpountry keeper chances to live near a mill, or possesses a mill of his own. It happens, however, that many cannot procure cracked corn as often as desira le, yet have ample facilities for growing corn. To this class The Poultry World suggests the growing of corn with naturally very small kernels. There are varieties of popcorn which meet the case, and furnish a fair story.

HE CLARION. the same time affords large sized ears to a goodly number on the stalk, so that it

Keeping Onions. Every year, says Joseph Harris in New England Farmer, we have many letters asking us for some method of keeping seed onlons. In our own case we should not try to keep them, unless it were a few or more new names, will have his own did of the others extended for one year, what you can get and pocket the loss. There are many ways of keeping good, ound, ripe, dry onions. The great point is to keep them dry. But you must recollect that even a ripe, dry onion contains at least 80 per cent. of water, and when a are introduced should be made by postomee order, or postal note, ones the same can be obtained, or or postal note, ones the same can be obtained, or or postal note, ones the same can be obtained, or or postal note, order or postal note. Here or they are liable to "sweat," and the skins and tops become damp; and if the temperature is above freezing they will throw out roots and commence to grow, just as they would in the damp soil. If it is necessary to keep them in a large mass, put them in a dry place, such as a shed or barn; then they will freeze as a shed or barn; then they will freeze solid, and stay frozen till wanted in spring. They must be well covered to keep them from thawing, and you should 2.36 avoid putting them in a barn with a 2.36 ment underneath, where horses, cattle

> Sheep in a Yard. Professional sheep growers seldom turn sheep into a yard with other stock. They have learned by experience that it does

not pay. In the case of high priced blooded stock it has sometimes been pretty dear experience. The farmer who keeps but few sheep and has never made a special study of the the flock will go hungry before they will

wonder that he has any, or that half his knowledge of the people, in the influence demagogues.

It costs builtile to have an extra yard for the sheep opening off their own pen or house. A few feet of lumber and a few hours' time can be well expended here hours' time can be well expended here his sheep in this way is not the says: "There ain't no profit in sheep anyway. I just keep a few to eat up the odds and ends," as a farmer remarked to the way. I just keep a few to eat up the odds and ends," as a farmer remarked to the writer only a few days ago.—Indiana Farmer.

It exerts in elevating and ennobling the farmer very near freezing up in time of the big snow. Old Uncle Si Oberly came very near freezing up in time of the big snow. A few years he, in the very city which had proved so fatal to her first love, lay down amid his ripe honors, and died, blessing her with his last word on earth. THE END.

ADDENDA.

The readers of the Waverly hardly life-long struggle of the heroic little woman, Myra Clark Gaines, made for

away in her warfare against injustice who will take taxes off from whisky and

where they might all breathe and laugh freely.

"Ah, doctor, are you sure that he is better—it was not done to cheer him up?" she cried, while her poor lips began to quiver with the fear that crept over her.

"Nothing of the sort, dear lady. He is doing well enough; but take care of yourning on either cheek startled her.

"She put the children aside, and seizing his hand gave another terrified look in his face. He tried to smile, but instantly lifted a hand to his forehead and grouned aloud.

"What is this, my husband—are you ill, or have you been walking in the hot sun?"

"He withdrew his hot hand from her clasp, and sharply ordered the children her land uny.

"Ah, doctor, are you sure that he is better—it was not done to cheer him up for the case was closed, the judge announced that he would read his decision the next morning. This delay seemed unbearable to Mrs. Gaines, and she returned home in a state bordering upon insanity, and walked wildly up and down her room. Her daughter went for Mrs. Stephens, who came instantly, and brought quiet and trust along. Mrs. Stephens had met the judge, and, with her usual directness, had asked him plumply what he was going to decide, at the same time telling him that she believed that the suspense would so nearly kill Mrs. Gaines before morning. He next morning. This delay seemed unp for the case was closed, the judge announced that he would read his decision the next morning. This delay seemed unp for the case was closed, the judge announced that he would read his decision up for this core to her bear said, leaning over the baluster.

After he was gone, Myra ran into the room where her children were kept safe from contagion, and gathering them to her bosom, lavished rapturous caresses on their smiling faces.

"He is better—it was not done to cheer him and the case was closed, the judge announced that he case was closed, the pudge announce mup?" she cried, while her poor lips began to quiver with the fear that crept over her.

"Nothing of the sort, dear lady. He is doing well enough; but take care of yourself."

Myra smiled on him through her tears. "God bless you for this comfort, he said, leaning over the baluster.

After he was gone, Myra ran into the room where her children were kept safe from contagion, and gathering them to her bosom, lavished rapturous careases on their smiling faces.

"He is better—he is better, my darlings; he, your blessed, blessed, blessed, pape.

Kiss me a thousand times, and when I am gone, go down on your kness so,

(VOL. 49--No. 57

Then Myra, having subdued her great joy, went back to the sick-room again. How still and deathly he lay under the tottered forward, and fell into Mrs. can be provision. Mr. Stanford based his whole tottered forward, and fell into Mrs. provision. Mr. Stanford based his whole white cloud of sunshine that brooded over the bed! Myra held her breath, Ann; I've won at last, and I owe it all fair construction.

The other ladies began to reproach in the following words: "It shall be un-His eyes were closed, and his lips Mrs. Stephens for her absence from the lawful for any common carrier subject
